PLUG-IN STRIP

TTS

printable textiles &
transfer printing media

With the step-by-step guide below, you can easily and precisely attach the textile fabric into the frame using plug-in strip.

Scan QR
for video

For optimal results, you will need the following items:

- Textile frame
- Plug-in strip
- Fabric
- Spatula
- A knife or scissors

THE PROCEDURE:

Step 1

Insert the plug-in strip into the frame with the barbs facing outward. Do this for the whole side.

Step 2

Start pressing the fabric into the frame with the spatula.

Step 3

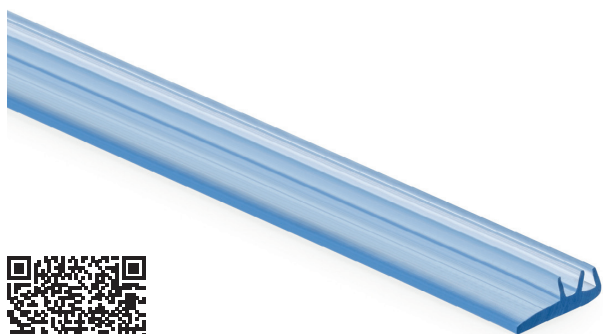

Trim the excess fabric, leaving approximately 1-3 cm.

Step 4

Press all the fabric into the frame with the spatula until the fabric is nice and tight.

PRODUCT INFORMATION

PVC STRIP PLUG-IN, ECO A2065B

The Plug-in Strip is made of PVC and is suitable for on-site installations. The strip is not sewn on the banner but pressed into the display frame together with the fabric. Specific profiles ensure secure fixation. Compliant with nearly all frame systems. No sewing needed.

SPATULA A99/SPATULA

The Spatula is perfect for securing 'tricky' textiles securely in the frame.
