Lightbox Textiles for Sublimation

Jupiter 240 FR

Jupiter 240 FR is a 240 gsm backlit fabric, designed for high-end lightbox applications. It features a lightweight design with optimal light transmission, high opacity and an ultra-smooth surface, ensuring even diffusion, bright colours and minimal light leakage in backlit use. Its dense knit, without coating, resists creasing and makes the fabric easy to transport, handle and install without losing performance. The soft touch delivers reliable results even in demanding use, making it ideal for both backlit lightbox textiles and frontlit frame system applications.

Flame retardant certified: EN 13501-1 B-s1,d0

USP's

- Excellent light diffusion
- Soft hand
- Crease free
- PVC free
- Non fraying
- Flame Retardant
- Cold cut

PROPERTIES	Jupiter 240 FR
Article number	F978FR02
Base material	100% polyester
Available roll width	160, 320 and 505 cm
Available roll length	75 m
Weight	240 g/m²
Structure	Knitted

SUB DIRECT · SUB PAPER TRANSFER · FR · COLD CUT · USE INDOOR · PHTHALATE FREE · PVC FREE

Lightbox Textiles for Sublimation

Polaris Stretch 195 FR

Polaris Stretch is a unique textile specially developed for lightboxes. It can be printed using sublimation direct and transfer.

What makes Polaris Stretch unique is that the textile has stretch in both directions and is therefore almost crease free. Due to the fine structure the textile has a perfect light diffusion and deep colors.

Fire retardant certified: EN 13501-1 B-s1,d0

Also available in a recycled version, made of 100% recycled yarns.

USP's
- Excellent light diffusion
- 3-5% stretch
- Crease free
- No ink migration
- PVC free
