PVC STRIP RECYCLED

PRODUCED FROM
100% RECYCLED STRIP

PVC STRIP 100% RECYCLED

The recycled flat elastic PVC strip is extremely suitable for use with a sewing machine due to its flexible material. The strip can be stitched onto (printed) textile cloths and ensures that it can be attached to aluminum textile frames. Suitable for textile frames, LED frames, stand construction, retail and interior.

Completely produced from 100% recycled strip.

- Produced from recycled PVC strip
- Environmentally friendly alternative
- Flexible
- Free from talc powder
- Affordable alternative
- No additional charge

Deposit System

Our unique system encourages sustainability and recycling by offering you the opportunity to return your old strip PVC elastic before ordering new ones. In short: First return, then delivery! This means that you can exchange the amount of strip you return for the same amount of new material.

Why participate?

- **Sustainability:** Contribute to a greener planet by recycling materials.
- **Cost Savings:** Benefit from immediate discounts and competitive prices.
- **Quality:** Experience our top-quality strip. Produced in Europe.
